› **THE MONEY**

756 mil. EUR

EU funding 2021 - 2022

THE POLITICS

The European data strategy of February 2020:

A common European data space, a single market for data

*creating a single market for data that will ensure Europe's **global competitiveness** and **data sovereignty**.*

Availability of high quality data to create and innovate

Data can flow within the EU and across sectors

Rules for access and use of data are fair, practical and clear & clear data governance mechanisms are in place

European rules and values are fully respected

defending and promoting European values and rights in the digital world.

THE VISION

Common European data spaces

Rich pool of data
(varying degree of
accessibility)

Free flow of data
across sectors and
countries

Full respect of GDPR

Horizontal
framework for data
governance and data
access

Health

Industrial &
Manufacturing

Agriculture

Finance

Mobility

Green Deal

Energy

Public
Administration

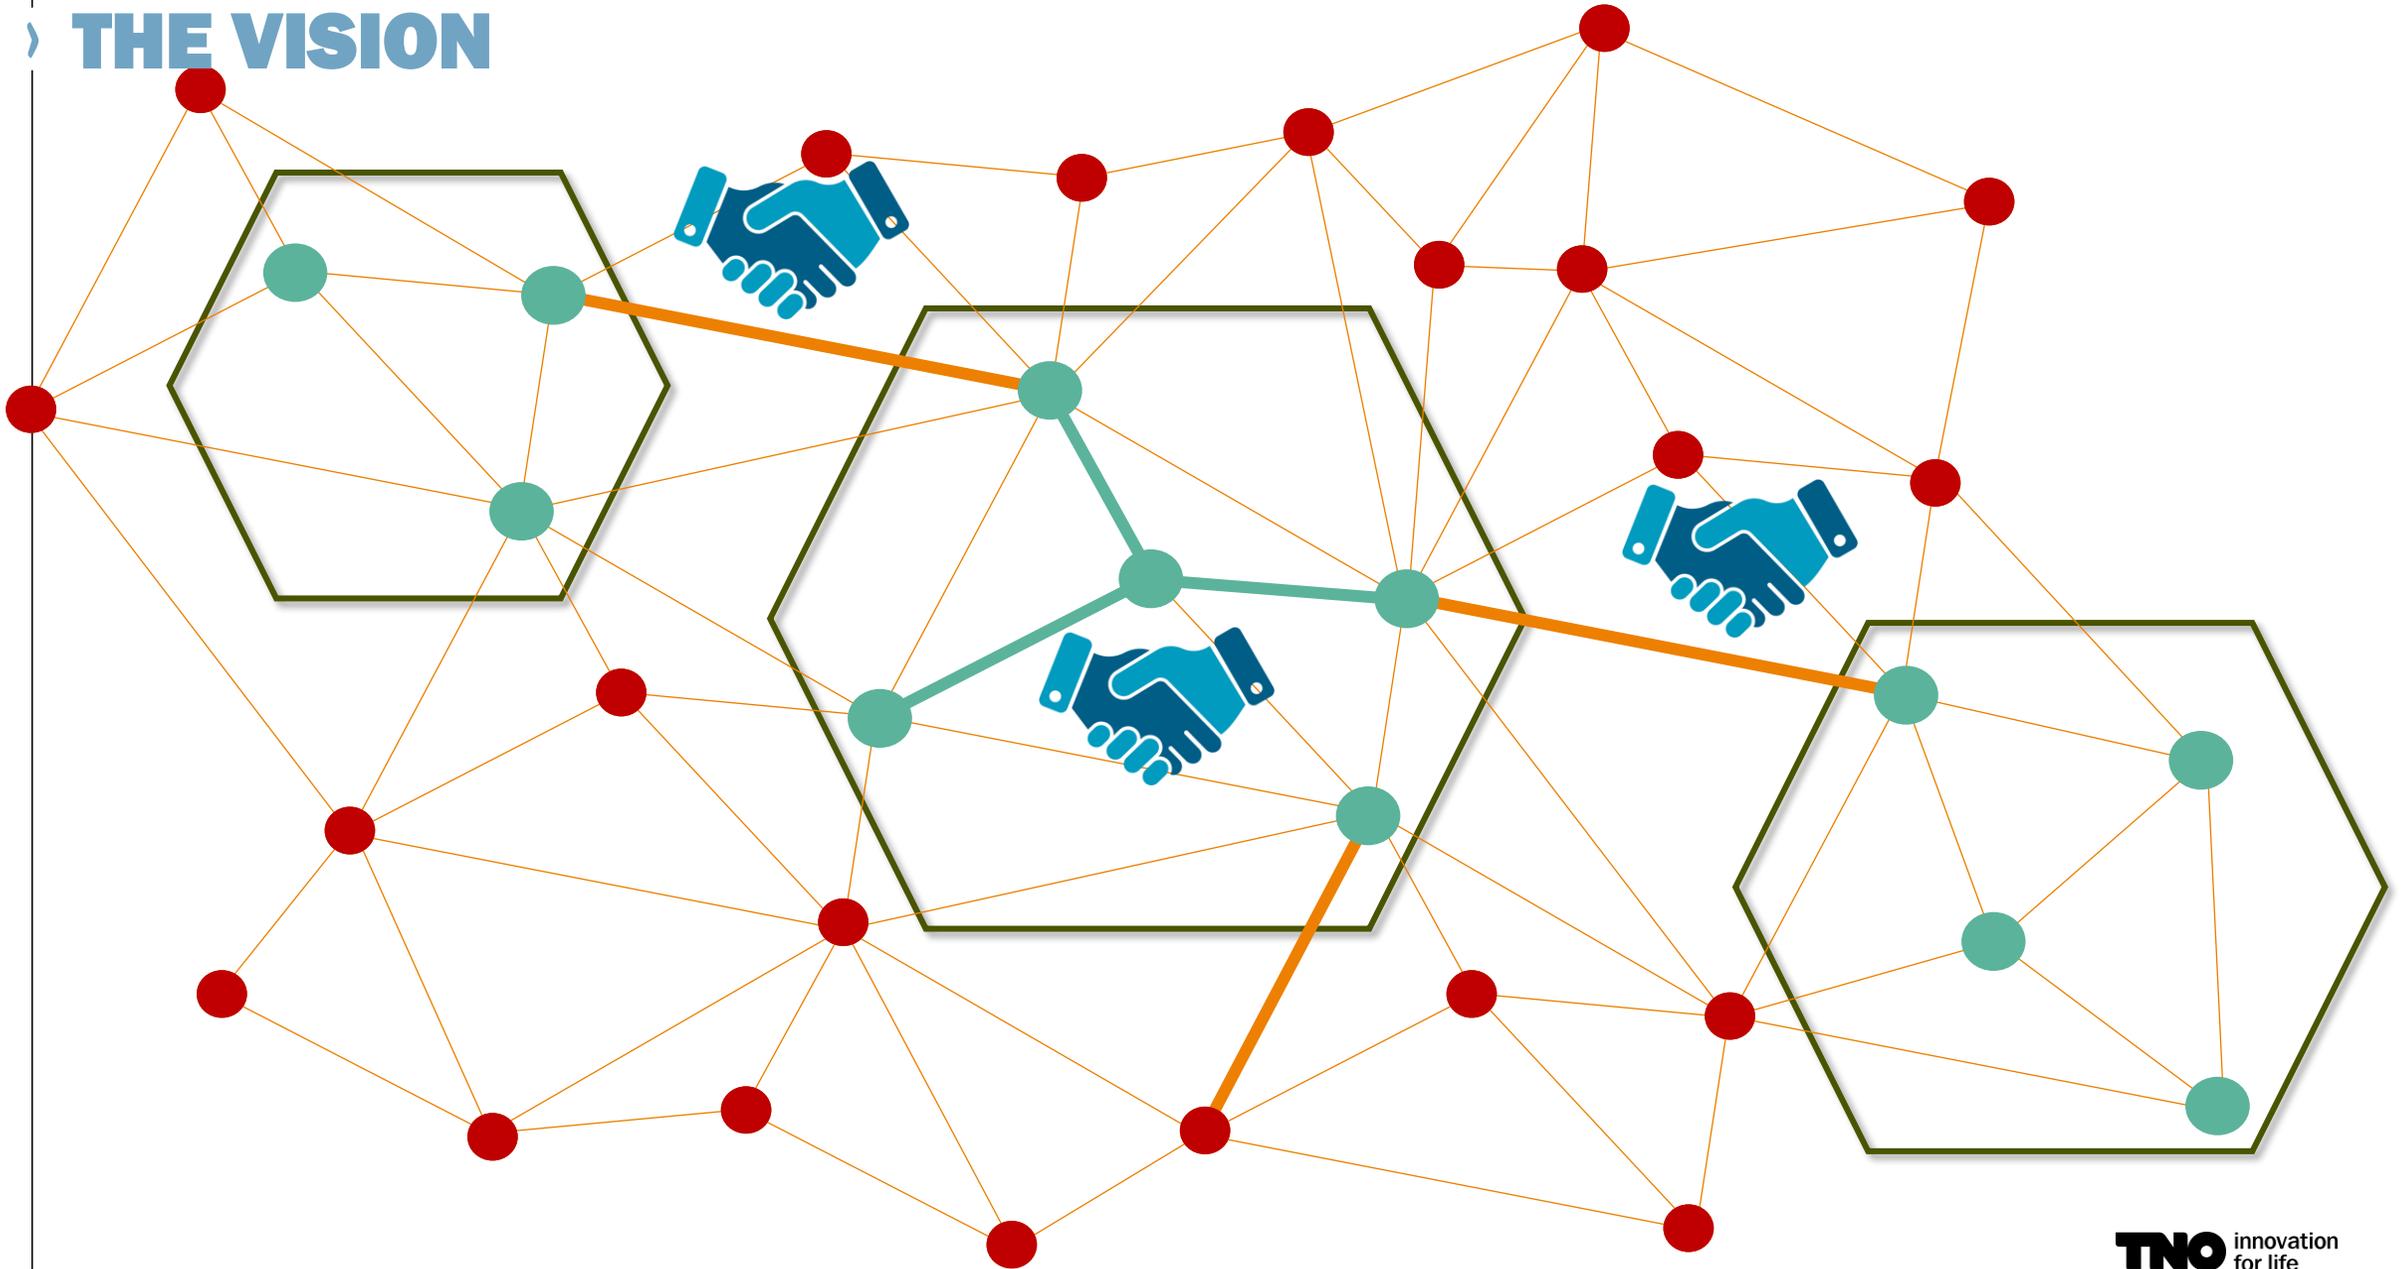

Skills

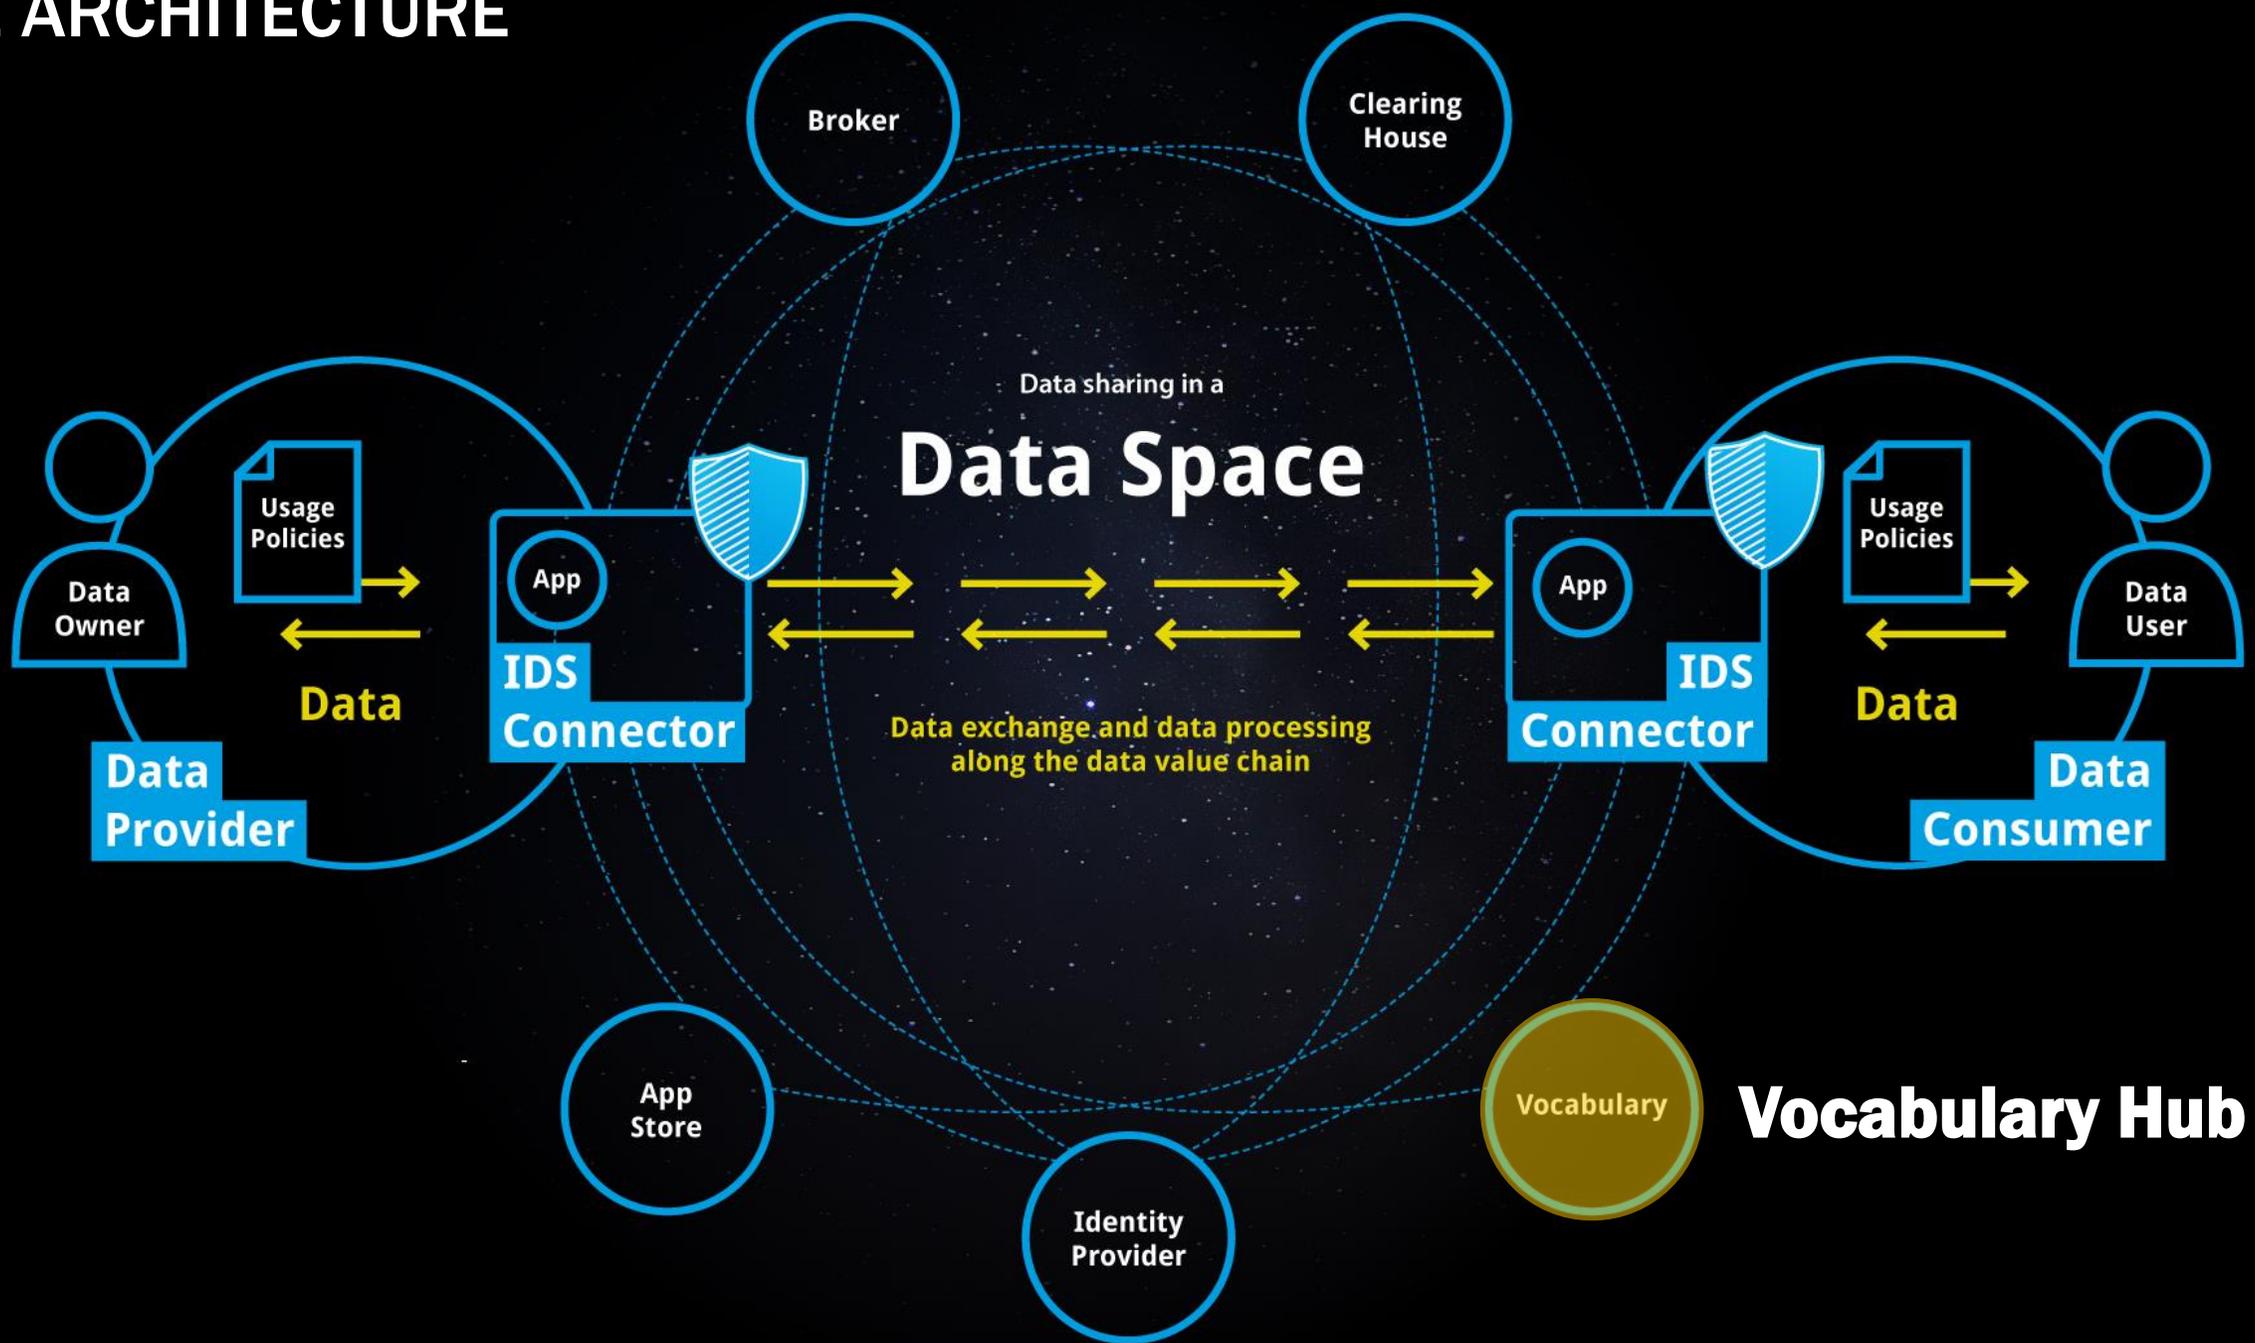

- Technical tools for data pooling and sharing
- Standards & interoperability (technical, semantic)

- Sectoral Data Governance (contracts, licenses, access rights, usage rights)
- IT capacity, including cloud storage, processing and services

THE VISION

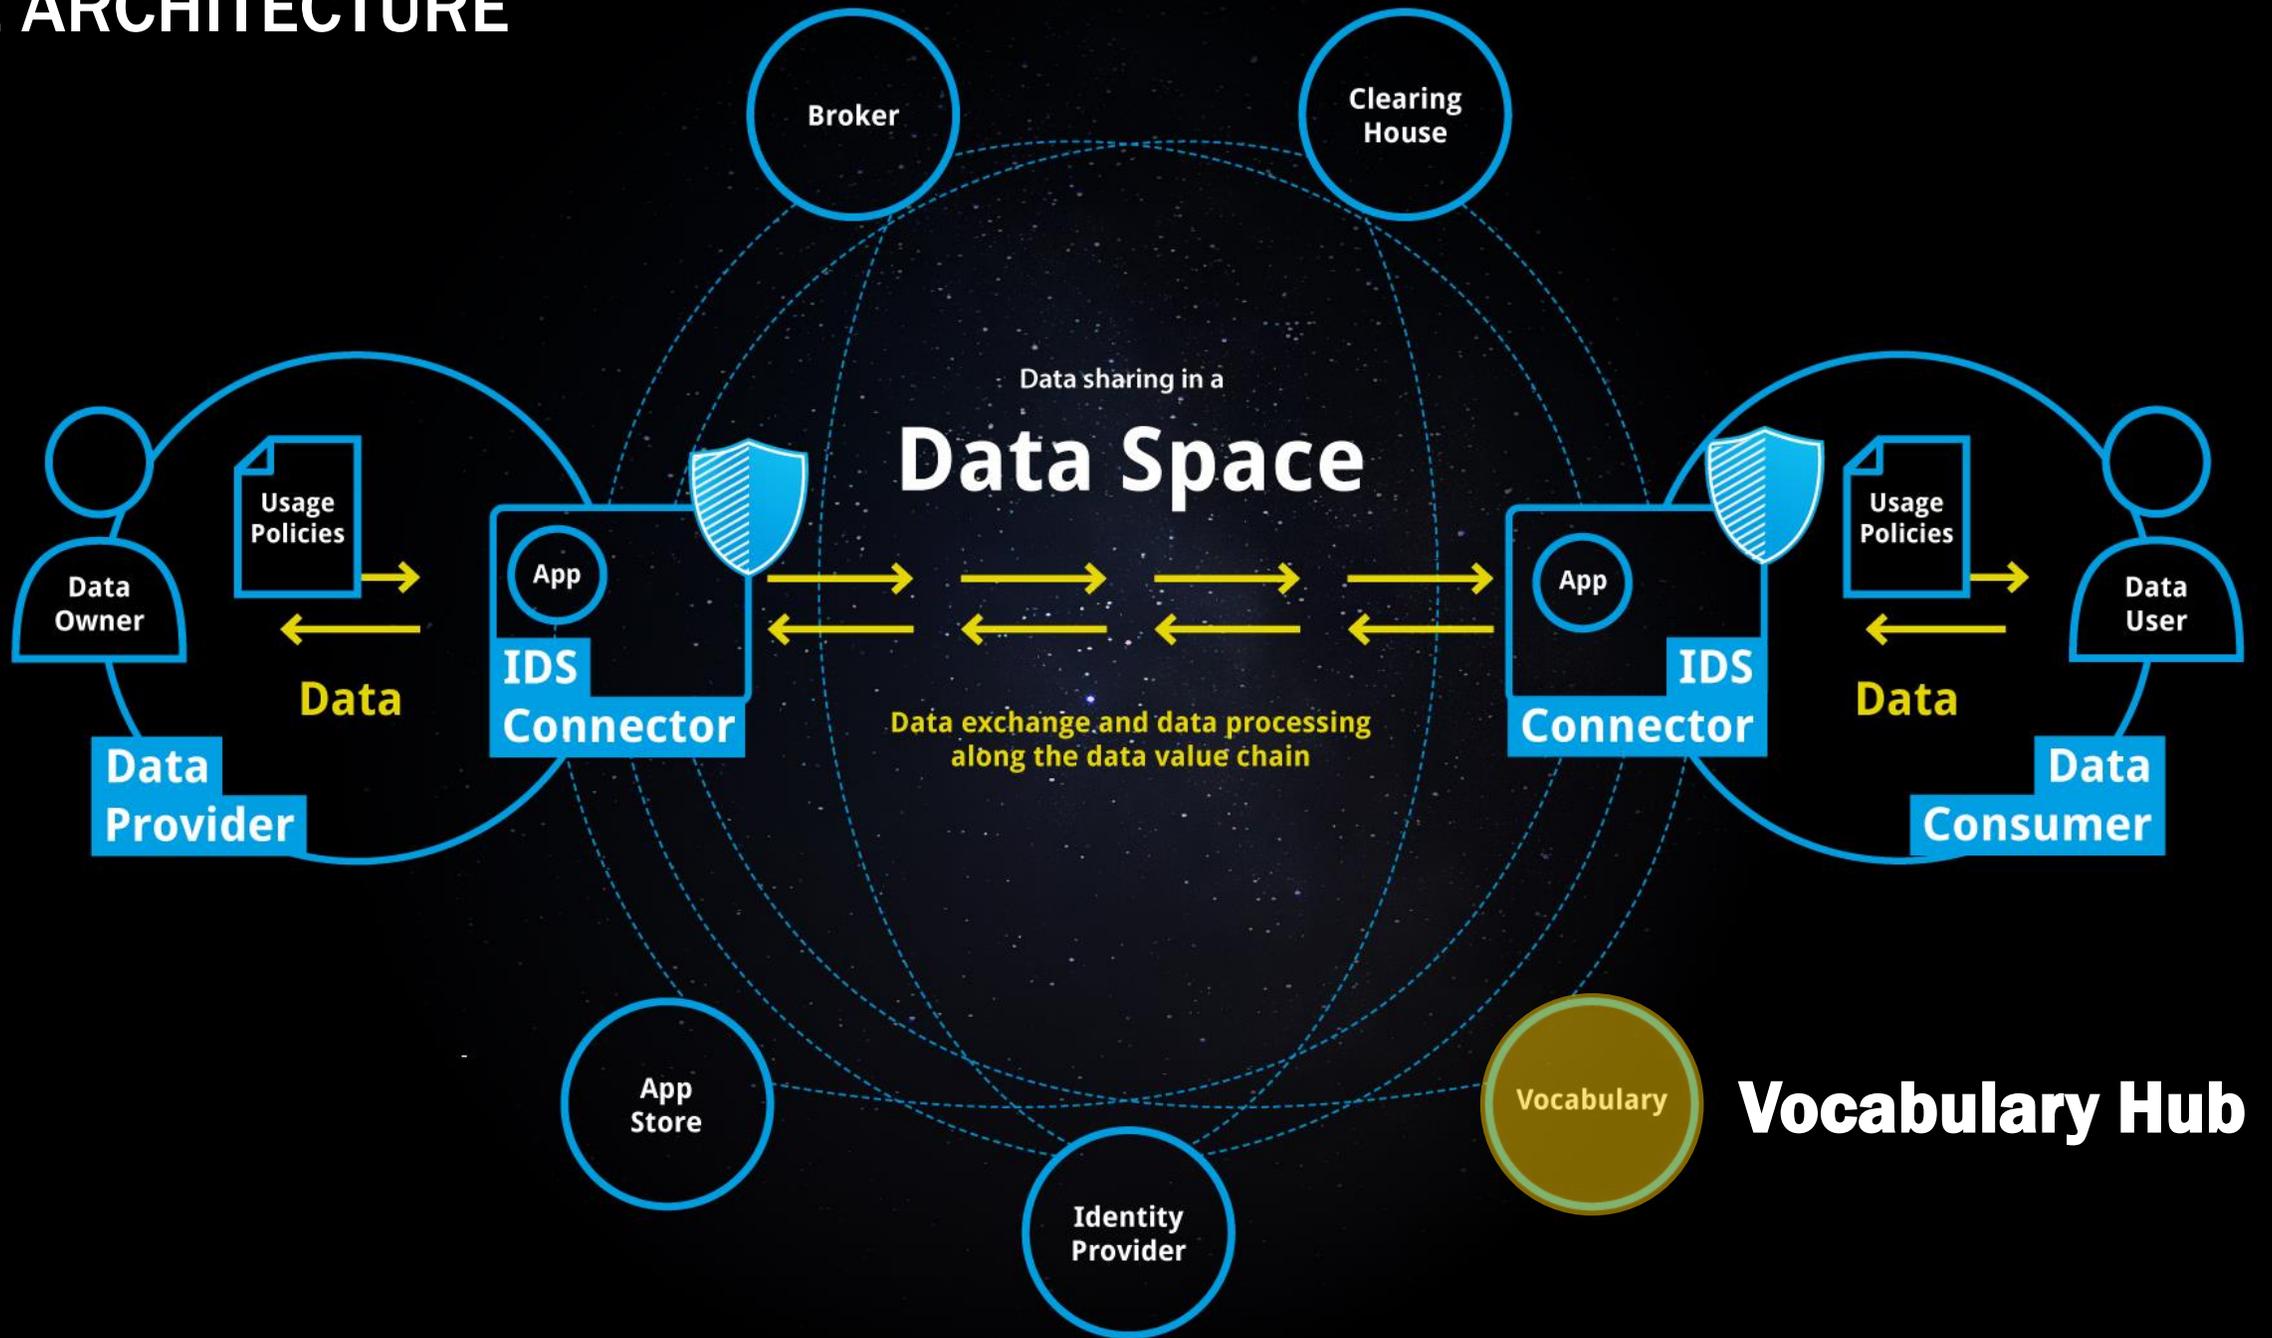

THE ARCHITECTURE

› AGENDA

01. INTRODUCTION
02. DATA SPACES? VOCABULARY HUB?
03. **SEMANTIC TREEHOUSE**
04. DEMO: ONTOLOGY-DRIVEN API SPECIFICATION
05. PUTTING THE VOCABULARY HUB IN PLACE
06. QUESTIONS & DIALOGUE

THE ARCHITECTURE

The **Vocabulary Hub** serves the maintenance of shared vocabularies and related (schema) documents.

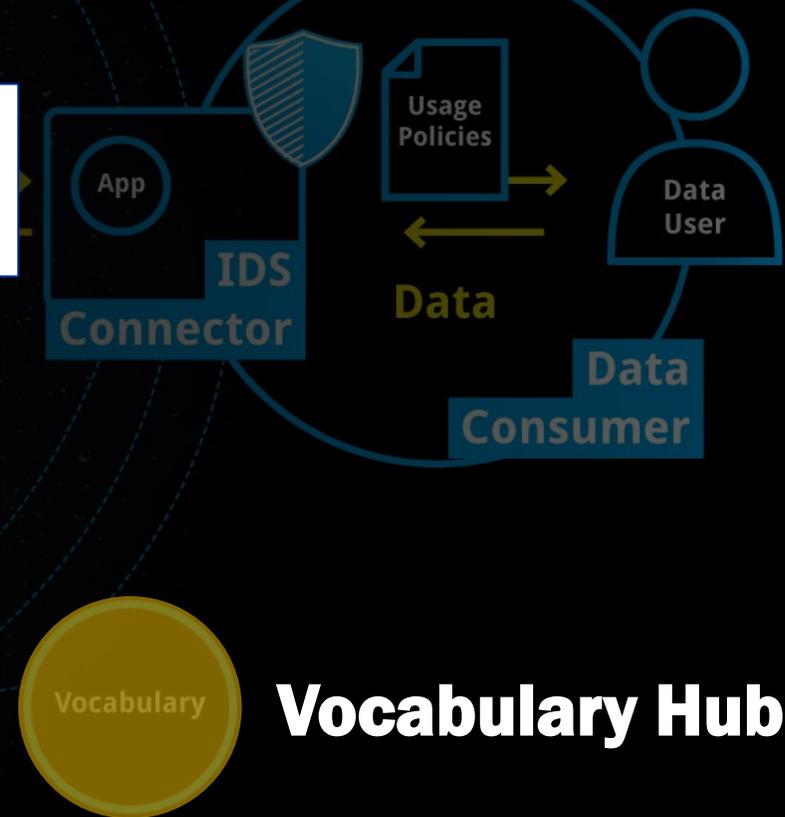

- [IDS Information Model](#)

Vocabulary Hub

Server providing maintenance facilities for editing, browsing and downloading vocabularies and related documents; mirrors a set of external third-party vocabularies ensuring seamless availability and resolution

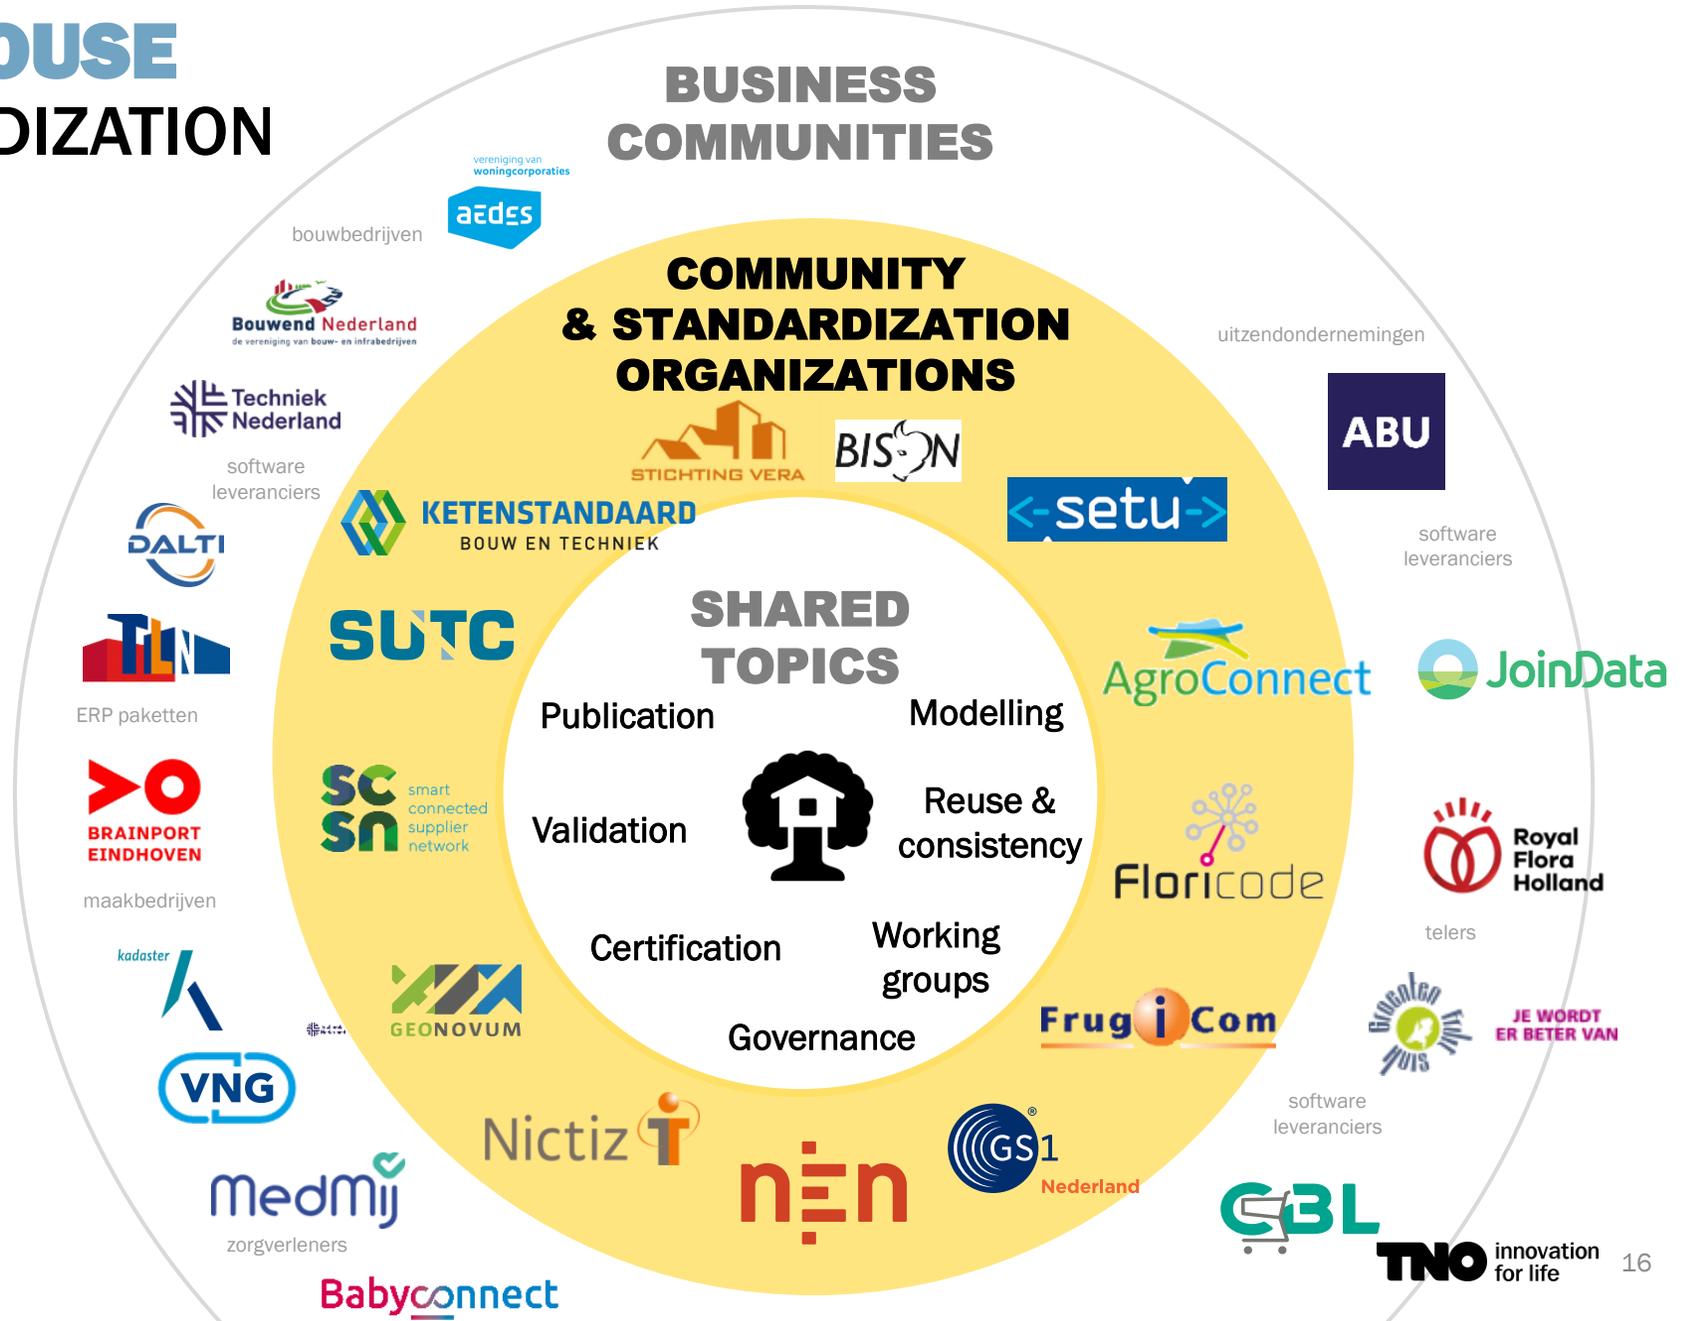

Vocabulary hubs are central servers that store vocabularies and enable collaboration. Collaboration may comprise search, selection, matching, updating, requests for changes, version management, deletion, duplicate identification, and unused vocabularies. Vocabulary hubs need to be managed.

- [IDS Reference Architecture Model \(IDS RAM\)](#)

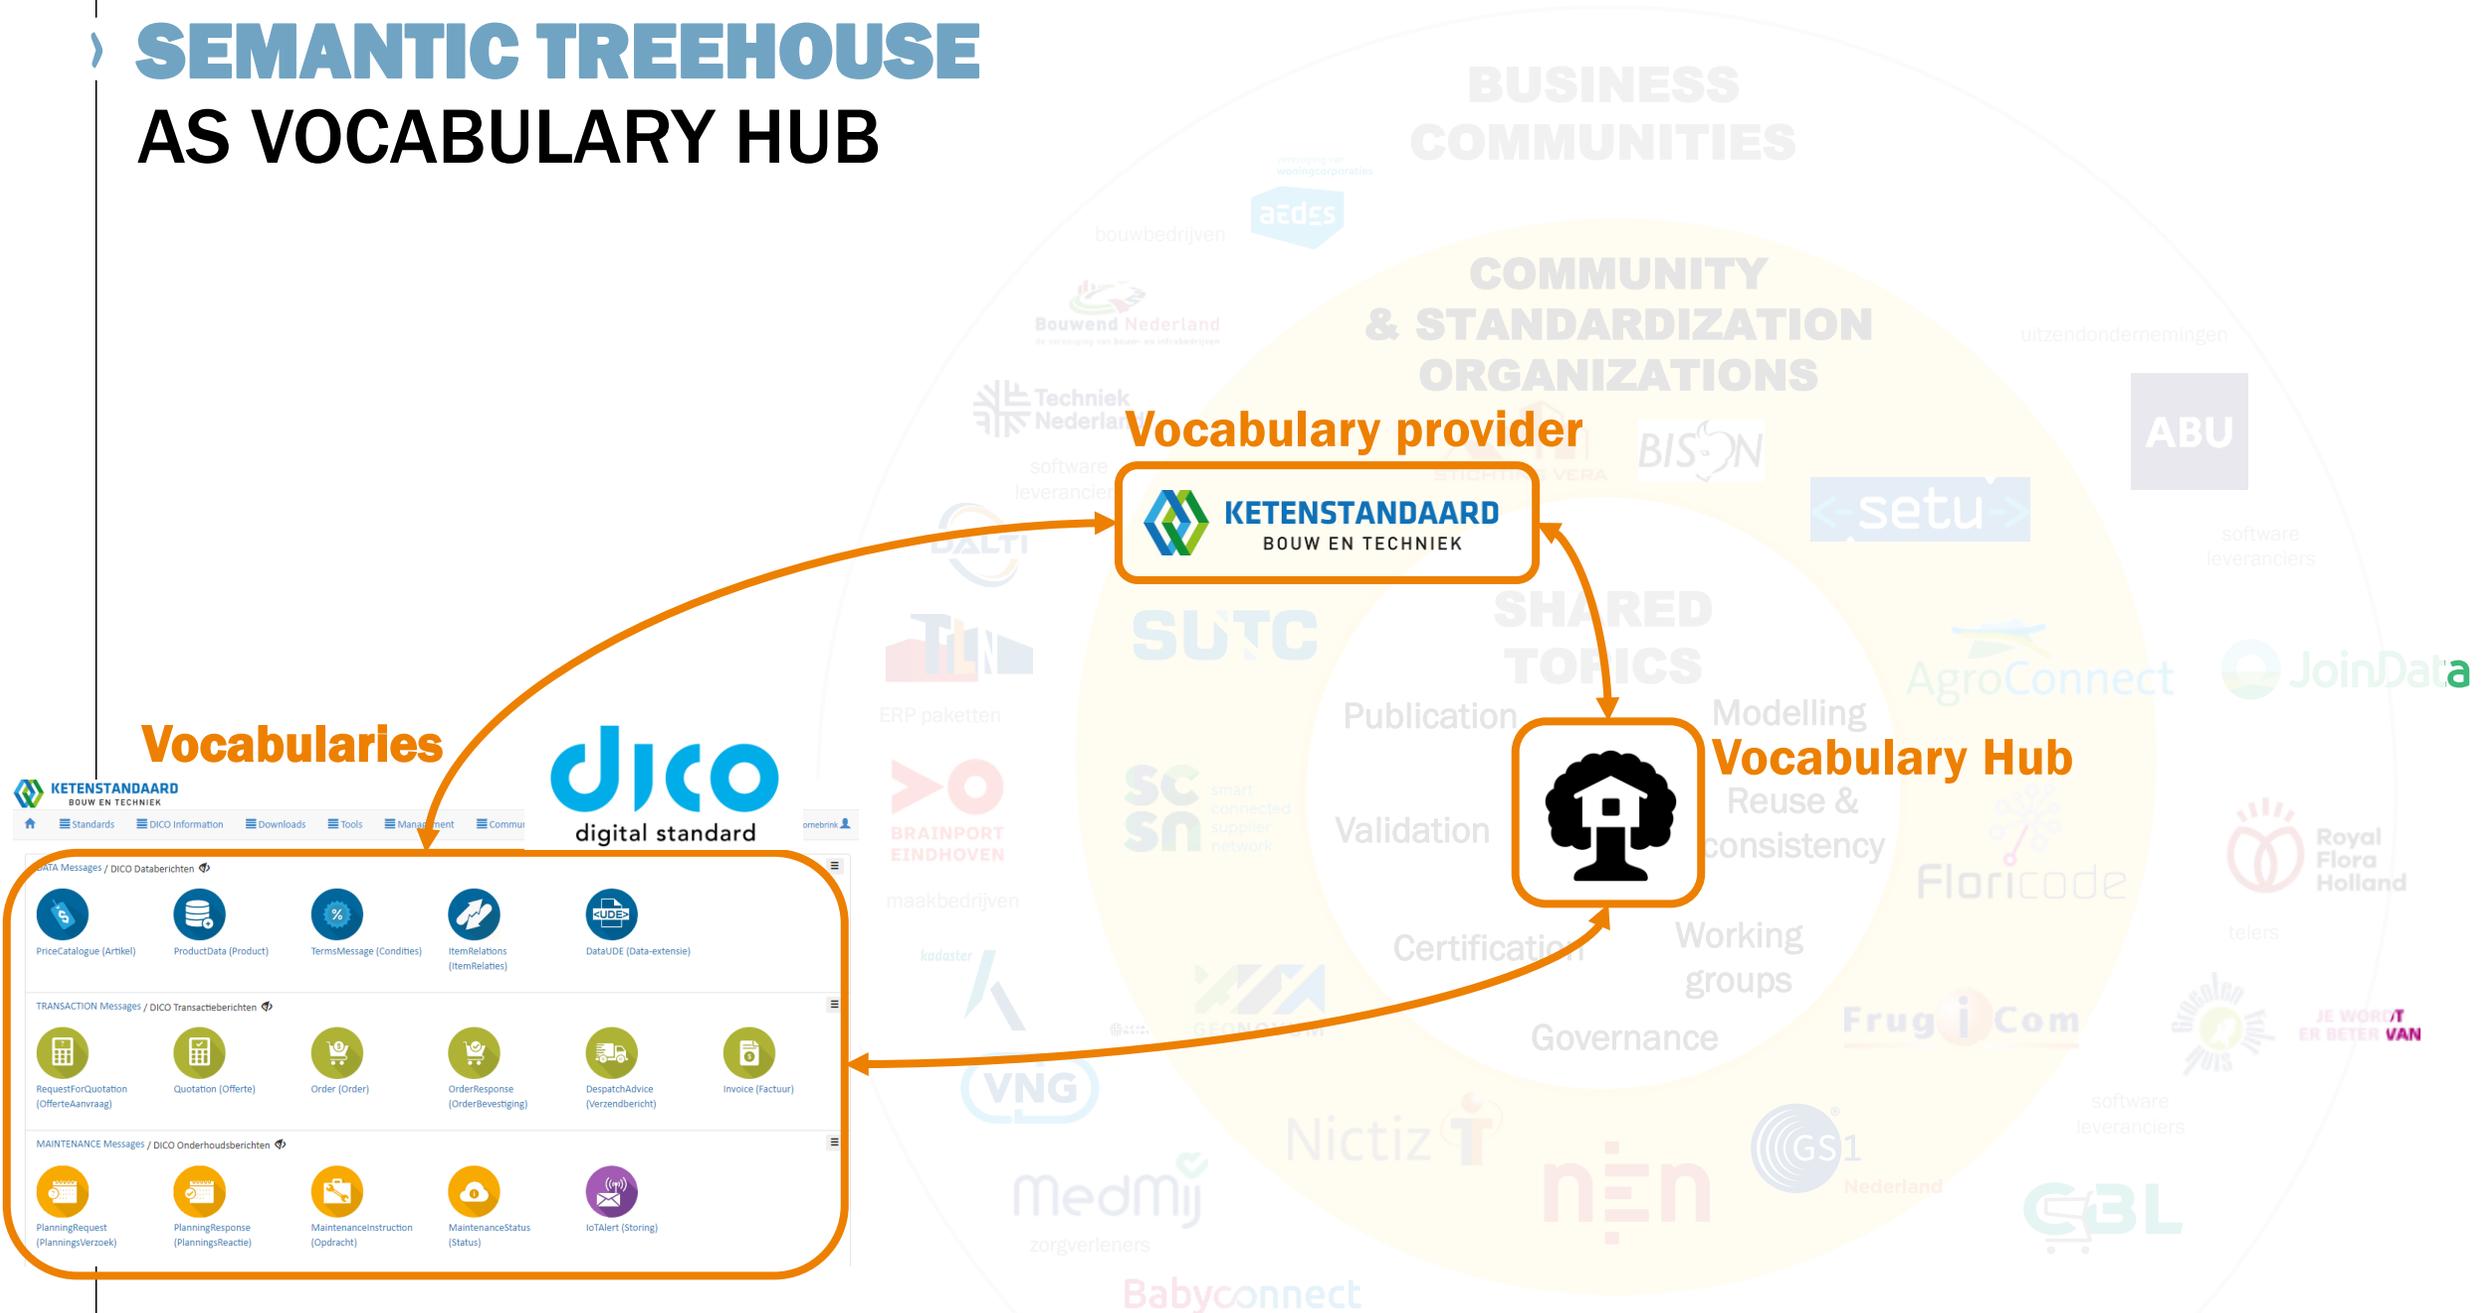

Vocabulary Hub

SEMANTIC TREEHOUSE SUPPORTS STANDARDIZATION ORGANIZATIONS

SEMANTIC TREEHOUSE AS VOCABULARY HUB

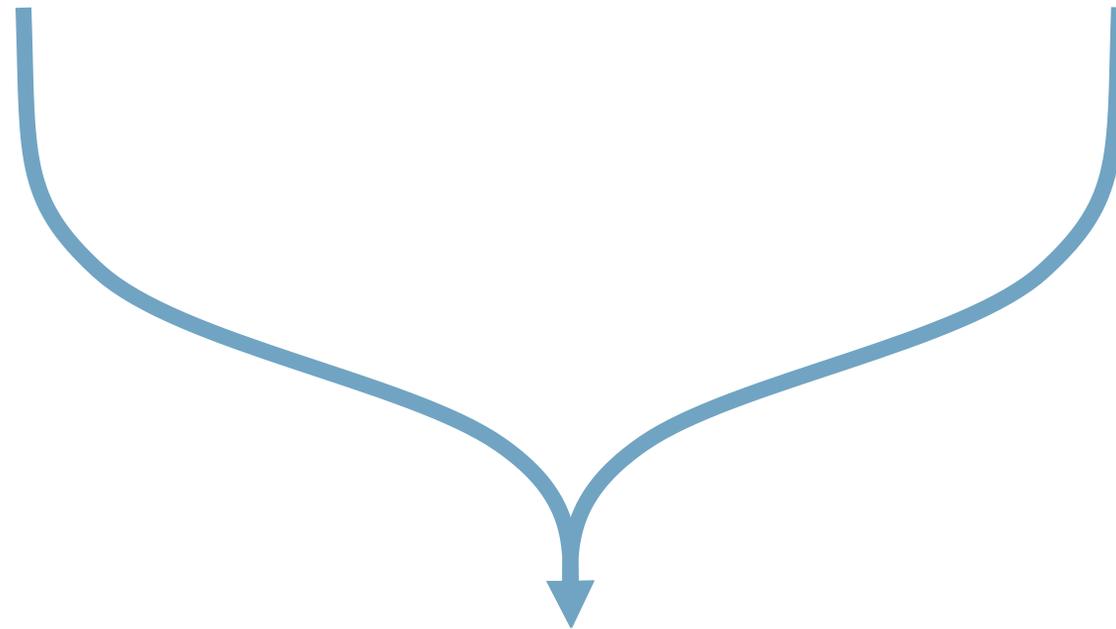

› WHAT'S BEEN DRIVING US

Ambition 1

Facilitate semantic interoperability

Ambition 2

Harness the power of linked data

Ontology-based specification of message models and APIs

› AGENDA
